## Alcohol-Related Liver Disease Research **Have Your Say**

1 in 5 of people in the UK are thought to have or be at risk of liver disease. Alcohol is one of the main causes.

- Do you have a question about the diagnosis, prevention, care or treatment of alcohol-related liver disease (ARLD)?
- Are you affected by or worried about ARLD? Is someone you know?
- Would you like to have a say in guiding research into ARLD?

If you answered yes to any of these questions, please ensure that your voice is heard by completing our survey:

[www.psp.nihr.ac.uk/alcohol-related-liver-disease/survey](http://www.psp.nihr.ac.uk/alcohol-related-liver-disease/survey)
