Low LF, Yap M, Brodaty H. A systematic review of different models of home and community care services for older persons. BMC Health Services Research. 2011;11:93

NOKR. Effect of day care centres for people with dementia. Oslo: The Norwegian Knowledge Centre for the Health Services

What non-pharmacological and/or pharmacological (drug) interventions are most effective for managing challenging behaviour/neuropsychological symptoms in dementia?

Including:
- In people with a family history/genetic risk factors for dementia
- For different cultural and ethnic groups

What are the most effective design features for producing dementia friendly environments at both the housing and neighbourhood levels, that best support people with dementia?

In terms of:
- Costs
- Physical function

What is the best way to communicate a diagnosis of dementia, including who is the best person to communicate the diagnosis and where should it be communicated?

How can GPs/primary care provide a more effective service for diagnosis/early diagnosis of dementia, including faster referral to specialists when needed?

What is the impact of early diagnosis of dementia on health-related outcomes for people with dementia and their carers; wider outcomes in society for people with dementia and their carers?

What is the impact of early intervention on delaying the onset of dementia?

Prevention

NO: This is an indicative uncertainty. This or a similar uncertainty was submitted the following number of times in the survey: 10

1. Including financial planning, insurance issues, employment prospects, independence, access to other healthcare services, driving)

2. Including:
- Vascular, Alzheimer’s, early onset?
- Are there any drinks that are effective to prevent/delay onset of dementia (2)?
- Risk factors for dementia (4)?
- Are interventions to change diet/improve nutrition effective in delaying or slowing the onset of dementia for all types of dementia (1)?
- Is diet/nutrition effective in delaying or slowing the onset of dementia in those with a family history/genetic risk factors for dementia (1)?
- Is coffee effective at delaying or slowing the onset of dementia (3)?

NO: This is an indicative uncertainty. This or a similar uncertainty was submitted the following number of times in the survey: 7

3. What are the benefits and drawbacks of different models of care for people with dementia who live in the community?

4. What are the benefits and drawbacks of different models of care for people with dementia who live in long-term care settings?

5. What is the role of day care centres for people with dementia?

6. What are the impact of day care centres on the health-related outcomes for people with dementia and their carers?

7. What are the impact of day care centres on the wider outcomes in society for people with dementia?

8. How can day care centres be improved and monitored?

9. Is health and safety a barrier to care for people with dementia in care homes?

10. What impact do day care centres have on the wellbeing of people with dementia?

11. What impact do day care centres have on the wellbeing of carers?

12. What impact do day care centres have on the cost of care?

13. What is the best way to communicate a diagnosis of dementia, including who is the best person to communicate the diagnosis and where should it be communicated?

14. How can GPs/primary care provide a more effective service for diagnosis/early diagnosis of dementia, including faster referral to specialists when needed?

15. What is the impact of early diagnosis of dementia on health-related outcomes for people with dementia and their carers; wider outcomes in society for people with dementia and their carers?

16. What is the impact of early intervention on delaying the onset of dementia?

17. Prevention

18. NO: This is an indicative uncertainty. This or a similar uncertainty was submitted the following number of times in the survey: 6

19. Including financial planning, insurance issues, employment prospects, independence, access to other healthcare services, driving)

20. Including:
- Vascular, Alzheimer’s, early onset?
- Are there any drinks that are effective to prevent/delay onset of dementia (2)?
- Risk factors for dementia (4)?
- Are interventions to change diet/improve nutrition effective in delaying or slowing the onset of dementia for all types of dementia (1)?
- Is diet/nutrition effective in delaying or slowing the onset of dementia in those with a family history/genetic risk factors for dementia (1)?
- Is coffee effective at delaying or slowing the onset of dementia (3)?

21. NO: This is an indicative uncertainty. This or a similar uncertainty was submitted the following number of times in the survey: 12

22. Including:
- Vascular, Alzheimer’s, early onset?
- Are there any drinks that are effective to prevent/delay onset of dementia (2)?
- Risk factors for dementia (4)?
- Are interventions to change diet/improve nutrition effective in delaying or slowing the onset of dementia for all types of dementia (1)?
- Is diet/nutrition effective in delaying or slowing the onset of dementia in those with a family history/genetic risk factors for dementia (1)?
- Is coffee effective at delaying or slowing the onset of dementia (3)?

23. NO: This is an indicative uncertainty. This or a similar uncertainty was submitted the following number of times in the survey: 7

24. What are the benefits and drawbacks of different models of care for people with dementia who live in the community?

25. What are the benefits and drawbacks of different models of care for people with dementia who live in long-term care settings?

26. What is the role of day care centres for people with dementia?

27. What are the impact of day care centres on the health-related outcomes for people with dementia and their carers?

28. What are the impact of day care centres on the wider outcomes in society for people with dementia?

29. How can day care centres be improved and monitored?

30. Is health and safety a barrier to care for people with dementia in care homes?

31. What impact do day care centres have on the wellbeing of people with dementia?

32. What impact do day care centres have on the wellbeing of carers?

33. What impact do day care centres have on the cost of care?

34. What is the best way to communicate a diagnosis of dementia, including who is the best person to communicate the diagnosis and where should it be communicated?

35. How can GPs/primary care provide a more effective service for diagnosis/early diagnosis of dementia, including faster referral to specialists when needed?

36. What is the impact of early diagnosis of dementia on health-related outcomes for people with dementia and their carers; wider outcomes in society for people with dementia and their carers?

37. What is the impact of early intervention on delaying the onset of dementia?

38. Prevention

39. NO: This is an indicative uncertainty. This or a similar uncertainty was submitted the following number of times in the survey: 12

40. Including:
- Vascular, Alzheimer’s, early onset?
- Are there any drinks that are effective to prevent/delay onset of dementia (2)?
- Risk factors for dementia (4)?
- Are interventions to change diet/improve nutrition effective in delaying or slowing the onset of dementia for all types of dementia (1)?
- Is diet/nutrition effective in delaying or slowing the onset of dementia in those with a family history/genetic risk factors for dementia (1)?
- Is coffee effective at delaying or slowing the onset of dementia (3)?

41. NO: This is an indicative uncertainty. This or a similar uncertainty was submitted the following number of times in the survey: 7
Does high quality care from carers/care staff improve outcomes for people with dementia? What are effective ways to implement such high quality care?

What are the most effective management approaches and models of care for people with concurrent dementia and vision problems/sight loss in all settings?

Care

What diagnostic tests/methods/strategies are clinically effective (and cost-effective) to improve diagnosis/early diagnosis of dementia?

Care

What are the most effective methods to improve the awareness and attitudes of all health and social care professionals towards people with dementia in all settings?

Are acetylcholinesterase inhibitors (donepezil, galantamine, rivastigmine) or memantine effective and cost-effective for people with dementia (and its sub-types)?
