	Question submitted for literature search	Theme	Answered?	Highest Level of evidence
1		Aftercare in primary care	no	
2	Is there an increase in the incidence of women under the age of 50 diagnosed with endometrial cancer? If so, what are the reasons for this increase?	Changing demographics of patients diagnosed	yes	1
3	Is there an increase in the incidence of diagnosed with high grade endometrial cancer? If so, what are the reasons for this increase?	Changing demographics of patients diagnosed	no	
4	Is chemotherapy effective in the primary treatment of endometrial cancer?	Chemotherapy/Radiotherapy for primary disease	yes	1
5	Are alternative therapies effective in the management of treatment toxicities?	Chemotherapy/Radiotherapy for primary disease	no	4
6	Is intracavity brachytherapy as effective as surgery for women with low risk stage 1 endometrial cancer who are unfit for surgery? $ \frac{1}{2} \left(\frac{1}{2} \right) = \frac{1}{2} \left(\frac{1}{2} \right) \left(\frac$	Chemotherapy/Radiotherapy for primary disease	no	4
7	Does histological subtype influence the efficacy of chemotherapy?	Chemotherapy/Radiotherapy for primary disease	no	2
8	Which patients will benefit from adjuvant chemotherapy or radiotherapy following surgery?	Chemotherapy/Radiotherapy for primary disease	no	
9	Would it be better to give chemotherapy for adjuvant treatment, rather than radiotherapy and then leave ERBT for salvage treatment?	Chemotherapy/Radiotherapy for primary disease	no	
10	Is there a place for neo-adjuvant chemothreapy in high-risk endometrial cancer?	Chemotherapy/Radiotherapy for primary disease	no	4
11	Does radiotherapy in high risk disease reduce risk of recurrence following surgery?	Chemotherapy/Radiotherapy for primary disease	yes	1
12	Does metformin improve response rates to adjuvant radiotherapy and or chemotherapy?	Chemotherapy/Radiotherapy for primary disease Chemotherapy/Radiotherapy for	no	5
13	How can we develop better-tolerated and more effective therapy for patients with advanced endometrial cancer?	primary disease Chemotherapy/Radiotherapy for	no	5
14	Can imaging predict which women will benefit from neoadjuvant radiotherapy? Is concomitant use of vaginal brachytherapy with external beam therapy beneficial compared to external beam	primary disease Chemotherapy/Radiotherapy for	no	4
15	therapy alone ?	primary disease Chemotherapy/Radiotherapy for	no	
16	Is chemoradiotherapy superior to chemotherapy alone as adjuvant treatment? Which is the best sequence for giving chemoradiotherapy - chemotherapy, radiotherapy sandwich, radiation	primary disease Chemotherapy/Radiotherapy for	no	
17	followed by chemotherapy, chemotherapy followed by radiation?	primary disease Chemotherapy/Radiotherapy for	no	4
18	What are the most appropriate chemotherapy agents to use in conjunction with radiation?	primary disease Chemotherapy/Radiotherapy for	no	
19 20	What are the biological mechanisms underpinning chemotherapy resistance in endometrial cancer? Is endometrial cancer associated with melanoma?	primary disease Comorbidities & Associations	no yes	1
21	What are risks in developing ovarian cancer following uterine cancer?	Comorbidities & Associations	yes	1
22	What are the risks developing of breast cancer following uterine cancer?	Comorbidities & Associations	yes	1
			1	1
23	What are the risks of developing lymphatic cancers following uterine cancer?	Comorbidities & Associations	yes	
24	Are women who have been diagnosed with breast cancer at higher risk of developing endometrial cancer? Should all patients with endometrial cancer have a fasting glucose/GTT performed to exclude the presence of	Comorbidities & Associations	no	2
25 26	undiagnosed diabetes? Should endometrial cancer patients be screened for other cancers?	Comorbidities & Associations Comorbidities & Associations	no no	5
27	To what extent is survival predicated on early diagnosis against co-morbid condition?	Comorbidities & Associations	no	
28	at what age should we investigate inter-menstrual bleeding or heavy menstrual bleeding?	Criteria for referral/investigation of symptoms	yes	1
29	Should all women with postmenopausal bleeding be investigated?	Criteria for referral/investigation of symptoms	yes	1
30	What is the best setting for a biopsy of a patient with suspected endometrial cancer	Criteria for referral/investigation of symptoms	no	
		Criteria for referral/investigation of		
	investigations for endometrial cancer when a) experiencing postmenopausal bleeding b) do not experience bleeding.		yes	1
	Does it take longer and are women diagnosed later in their disease course if they present with irregular or heavy	Criteria for referral/investigation of		
32	menstrual bleeding rather than postmenopausal bleeding?	symptoms	no	4
33	What is the optimal threshold level for endometrial thickness which further investigations are warranted in a premenopausal woman?	Criteria for referral/investigation of symptoms	no	4
24	When should re-investigation be performed in woman who has a normal biopsy and hysteroscopy but has recurrent or persisting post menopausal bleeding?	Criteria for referral/investigation of	no	4
34	or becausing host memohansar meaning:	symptoms Criteria for referral/investigation of	no	4
35	What is the incidence of occult endometrial cancer? i.e. women who are asymptomatic and have endometrial cancer	symptoms	no	4
36	What is the negative predictive value of TVUSS for women with suspected endometrial cancer?	Diagnostic Accuracy	yes	1
	what are the relative diagnostic test accuracy characteristics of pipelle, hysteroscopy and transvaginal ultrasound			
			yes	1
37	with regards to endometrial cancer?	Diagnostic Accuracy	1	
38	What is the negative predictive value of a combination of TVUSS and endometrial sampling?	Diagnostic Accuracy	no	
38 39	What is the negative predictive value of a combination of TVUSS and endometrial sampling? Is pelvis USS a valid screening test for endometrial cancer (in those over 40)?		1	
38 39 40	What is the negative predictive value of a combination of TVUSS and endometrial sampling? Is pelvis USS a valid screening test for endometrial cancer (in those over 40)? If a woman has had PMB investigated with hysteroscopy which is normal, what is their subsequent risk of developing endometrial cancer in the future if they represent with further PMB	Diagnostic Accuracy Diagnostic Accuracy Diagnostic Accuracy	no no no	4
38 39	What is the negative predictive value of a combination of TVUSS and endometrial sampling? Is pelvis USS a valid screening test for endometrial cancer (in those over 40)? If a woman has had PMB investigated with hysteroscopy which is normal, what is their subsequent risk of developing endometrial cancer in the future if they represent with further PMB Is pipelle sampling as accurate as hysteroscopy in women with ET 3-5mm?	Diagnostic Accuracy Diagnostic Accuracy	no no	4
38 39 40	What is the negative predictive value of a combination of TVUSS and endometrial sampling? Is pelvis USS a valid screening test for endometrial cancer (in those over 40)? If a woman has had PMB investigated with hysteroscopy which is normal, what is their subsequent risk of developing endometrial cancer in the future if they represent with further PMB Is pipelle sampling as accurate as hysteroscopy in women with ET 3-5mm? Are dedicated postmenopausal bleeding and menstrual dysfunction clinics more clinically and cost effective than a general gynaecology service?	Diagnostic Accuracy Diagnostic Accuracy Diagnostic Accuracy	no no no	4 1
38 39 40 41 42 43	What is the negative predictive value of a combination of TVUSS and endometrial sampling? Is pelvis USS a valid screening test for endometrial cancer (in those over 40)? If a woman has had PMB investigated with hysteroscopy which is normal, what is their subsequent risk of developing endometrial cancer in the future if they represent with further PMB Is pipelle sampling as accurate as hysteroscopy in women with ET 3-5mm? Are dedicated postmenopausal bleeding and menstrual dysfunction clinics more clinically and cost effective than a general gynaecology service? In pre-menopausal women with abnormal bleeding, what is the most accurate method of diagnosing endometrial cancer?	Diagnostic Accuracy Diagnostic Accuracy Diagnostic Accuracy Diagnostic Accuracy Diagnostic Accuracy Diagnostic Accuracy	no no no yes yes	1
38 39 40 41 42 43 44	What is the negative predictive value of a combination of TVUSS and endometrial sampling? Is pelvis USS a valid screening test for endometrial cancer (in those over 40)? If a woman has had PMB investigated with hysteroscopy which is normal, what is their subsequent risk of developing endometrial cancer in the future if they represent with further PMB Is pipelle sampling as accurate as hysteroscopy in women with ET 3-5mm? Are dedicated postmenopausal bleeding and menstrual dysfunction clinics more clinically and cost effective than a general gynaecology service? In pre-menopausal women with abnormal bleeding, what is the most accurate method of diagnosing endometrial cancer? what are the factors associated with missed diagnosis of endometrial cancer? What techniques are available to distinguish between endometrial endometrioid adenocarcinoma with synchronous	Diagnostic Accuracy	no no no yes yes yes	5
38 39 40 41 42 43	What is the negative predictive value of a combination of TVUSS and endometrial sampling? Is pelvis USS a valid screening test for endometrial cancer (in those over 40)? If a woman has had PMB investigated with hysteroscopy which is normal, what is their subsequent risk of developing endometrial cancer in the future if they represent with further PMB Is pipelle sampling as accurate as hysteroscopy in women with ET 3-5mm? Diagnostic Accuracy	no no no yes yes yes no	5

	Question submitted for literature search	Theme	Answered?	Highest Level of evidence
				or evidence
55	Are premenopausal patients being offered counselling about their fertility and fertility sparing options?	Fertility sparing	no	
56	Is there a genetic predisposition amongst sufferers of serous endometrial carcinoma?	Genetics	no	4
57	What is the prevalence of Lynch syndrom amongst women with endometrial cancer?	Genetics	no	3
58	What is the incidence of somatic LS gene mutation in womb cancer?	Genetics	no	4
59	What is the relative risk of finding a cancer associated gene mutation in women with endometrial cancer who have a family history of cancer?	Genetics	no	3
60	Should we refer all young women with endometrial cancer for genetic screening even when there are other risk factors e.g obesity which may be more important in its development'?	Genetics	no	
61	Is there a genomic association with response to treatment?	Genetics	no	5
	What is the psychological impact of being tested for and having being diagnosed with an endometrial cancer			
62	associated gene mutation e.g. Lynch syndrome/Cowden syndrome?	Genetics	yes	1
63	Who should be screened for Lynch syndrome/Cowden syndrome?	Genetics	no	3
	What novel therapies may be useful in women with high-risk endometrial cancer i.e. grade 3/uterine serous/clear			
64	cell?	Identifying recurrence	no	5
65	What is thepredictive value of patient reported symptoms in determining likelihood of recurrence?	Identifying recurrence	No	3
66	What is the ideal length of clinical follow up following treatment for patients with endometrial cancer?	Identifying recurrence	No	4
67	Is telephone-based follow up effective in women treated for endometrial cancer?	Identifying recurrence	No	
68	What is the sensitity/ specificity of pelvic examinations to detect recurrence?	Identifying recurrence	No	4
69	How can we better engage primary care in the effective follow up of patients?	Identifying recurrence	No	5
70	How useful is 5 year follow up post treatment?	Identifying recurrence	no	5
	Which group of health care professionals are the most apropriate to offer long term follow up to patients following			
71	treatment for endometrial cancer? e.g oncology/surgeons, specialtist nurses, GPs	Identifying recurrence	no	5
72	Is the routine use of imaging post treatment effective at detecting recurrence and improving outcomes?	Identifying recurrence	no	5
73	Is Ca125 monitoring effective to detect recurrence?	Identifying recurrence	no	5
74	Are scheduled or patient triggered follow up appointments most appropriate in the follow up setting?	Identifying recurrence	no	5
75	Why do endometrial cancers recur?	Identifying recurrence	no	5
76	What is the most cost-effective strategy to identify cancer recurrence?	Identifying recurrence	no	5
77	What are the relevant diagnostic test accuracies of the imaging modalities used to detect recurrence?	Identifying recurrence	no	5
78	What is the ideal venue for follow up?	Identifying recurrence	no	4
79	How many endometrial cancers are detected by abnormal endometrial shed on smears?	Impact of cervical screening	no	1
,,,	, 2aometria cancers are accessed by abnormal endomedial silea on silicals:	page of dervious serversing	1	†
80	Can earlier identification of womb cancer be achieved through easier access to definitive tests in the future? Do women who see the same gynaecologist regularly get diagnosed with a) womb cancer, b) womb cancer	NHS policy/comissioning	no	
81	recurrences earlier?	NHS policy/comissioning	no	Α
82	Is the amount of funding into womb cancer research proportional to the burden of disease?	NHS policy/comissioning	no	
- 62	is the amount of funding into worns cancer research proportional to the burden of disease?	NH3 policy/cornissioning	110	,
83	What will the impact of the increasing rate of womb cancer have on the provision of care provided by the NHS?	NHS policy/comissioning	no	
	Is there a conception among sponsors of medical research that endometrial cancer usually presents in early stage			
84	and has good prognosis and hence we should be focusing on other, more sinister and aggressive types of cancer?	NHS policy/comissioning	no	5
85	How do we ensure funding bodies and the pharmaceutical industry prioritise endometrial cancer?	NHS policy/comissioning	no	
	Are patients with abnormal uterine bleeding who are referred to private hospitals diagnosed with womb cancer at an			
86	earlier stage than those who go via the GP gatekeeper to secondary care?	NHS policy/comissioning	no	4
	Should mixed Mullerian gynae cancer to be studied on its own, or does it belong under the overall womb cancer			
87	umbrella?	Non endometrioid cancers	no	4
88	Does serous cancer of the uterus share a common origin with other pelvic high grade serous cancers?	Non endometrioid cancers	no	4
89	Do leioyosarcomas arise de novo or do they originate in leiomyomas?	Non endometrioid cancers	no	4
90	What is the best management for carcinosarcoma?	Non endometrioid cancers	yes	1
91	Are platinum and taxol based chemotherapy regimes effective in uterine papillary serous carcinomas?	Non endometrioid cancers	no	4
92	What are the predictors of relapse in endometrial stromal sarcoma?	Non endometrioid cancers	no	4
93	Are cancers associated with obesity different in their pathogenesis?	Obesity and Physical activity	no	
	Can diagnostic imaging predict in older/obese women which patients may benefit from radiotherapy over surgical			
94	treatment as a primary treatment?	Obesity and Physical activity	no	5
95	What is the risk of death in morbidly obese patients undergoing hysterectomy for endometrial cancer	Obesity and Physical activity	no	4
96	Can hysterectomy for endometrial cancer be safely delayed to accommodate bariatric surgery/ hormone treatment?	Obesity and Physical activity	no	4
97	Can surgery be safely omitted if replaced by bariatric surgery/ hormone therapy?	Obesity and Physical activity	no	5
98	Does time between diagnosis / treatment affect prognosis?	Obesity and Physical activity	no	4
99	Does weight loss improve outcomes following treatment for endometrial cancer?	Obesity and Physical activity	no	4
				1 4
	What is the optimal timing and nature of lifestyle interventions to promote healthier lifestyles in obese women		110	4
100		Obesity and Physical activity	no	2
	What is the optimal timing and nature of lifestyle interventions to promote healthier lifestyles in obese women			
100	What is the optimal timing and nature of lifestyle interventions to promote healthier lifestyles in obese women diagnosed with endometrial cancer?	Obesity and Physical activity	no	
100	What is the optimal timing and nature of lifestyle interventions to promote healthier lifestyles in obese women diagnosed with endometrial cancer? Is analgesia needed routinely for outpatient hysteroscopy? If so what is the best method?	Obesity and Physical activity	no	
100 101	What is the optimal timing and nature of lifestyle interventions to promote healthier lifestyles in obese women diagnosed with endometrial cancer? Is analgesia needed routinely for outpatient hysteroscopy? If so what is the best method? What is the incidence of musculoskeltal problems after hysterectomy and what methods are clinically and cost	Obesity and Physical activity Pain issues	no no

	Question submitted for literature search	Theme	Answered?	of evidence
122	How can we predict which lesions will evolve into invasive cancer and which will resolve spontaneously? Is there a role for progesterone contraceptives in nulliparous women once they get to their 40's to prevent	Prevention of primary disease	no	5
123	endometrial cancer?	Prevention of primary disease	no	2
124	Is there a reduction in life-time risk of endometrial cancer in women who use the mirena for abnormal bleeding?	Prevention of primary disease	yes	1
125	Are progestin-impregnated IUDs as effective at preventing womb cancer as oral contraceptives?	Prevention of primary disease	no	1
126	Are the risks of breast cancer in women using progestin intrauterine devices long term for prophylaxis less than that associated with oral contraceptive use?	Prevention of primary disease	no	3
126	Can we identify a population of women at sufficiently high risk of endometrial cancer who might benefit from a	Prevention of primary disease	110	3
127 128	prevention strategy? Does endometrial ablation prevent womb cancer?	Prevention of primary disease Prevention of primary disease	no no	3
128	Does endometrial abiation prevent womb cancer?	Prevention of primary disease	no	3
129	How should postmenopausal women found to have proliferative endometrium on biopsy be managed?	Prevention of primary disease	no	4
130	How effective are progesterone treatments for atypical hyperplasia? Is oral or intrauterine progesterone more effective for prevention of endometrial cancer in those with hyperplasia	Prevention of primary disease	yes	1
131	with and without atypia?	Prevention of primary disease	yes	1
132 133	what monitoring is best in women with atypical hyperplasia treated with IUS? Does the mirena coil reduce the risk of endometrial cancer in women with Lynch syndrome?	Prevention of primary disease Prevention of primary disease	no no	5
134	what are the risks and benefit of prophylactic hysterectomy in obese women after they have finished their family? What interventions ahave been shown to be effective at preventing endometrial cancer? (e.g., intrauterine	Prevention of primary disease	no	
	progestins, oral progestins, weight loss, metformin, vitamin D, hysterectomy, endometrial ablation, endometrial			
135	curettage, physical activity, COCP)	Prevention of primary disease	no	2
136	Should women with HNPCC syndrome be offered prophylactic hysterectomy to prevent endometrial cancer?	Prevention of primary disease	no	4
	Should women with Lynch Syndrome/Cowden's syndrome be offered risk reducing hysterectomy and bilateral			
137	salpingoophrectomy to reduce their risk or endometrial surveillance to reduce their risk of endometrial or ovarian cancer related mortality?	Prevention of primary disease	no	4
138	Is there a role for aspirin in prevention/reducing progression?	Prevention of reccurrence	no	2
139	Can alternative treatments improve the efficacy of adjuvant chemotherapy?	Prevention of recurrence	no	
140	Can the risk of endometrial cancer recurrence be reduced by changing lifestyle factors? Does adjuvant metformin as maintenance therapy reduce the risk of disease recurrence in patients at high risk for	Prevention of recurrence	no	5
141	relapse?	Prevention of recurrence	no	2
142	Can lifestyle changes and weight reduction overall survival? What is the most effective educational intervention to improve primary healthcare professionals' ability to detect	Prevention of recurrence	no	2
143	endometrial cancer?	Professional awareness	no	5
144	How can the experience of diagnosis, examinations, etc. be improved with regards to preserving patient dignity,	Drafassianal autoronass		
144 145	modesty and comfort? What percentage of the GPs/nurses recognise that obesity is a risk factor for endometial cancer?	Professional awareness Professional awareness	no no	3
146	Does pre-operative MRI predict outcomes in endometrial cancer?	Prognosis	no	2
147	Is colonisation of the cervical epithelium without cervical stromal invasion (i.e. old stage 2a) by endometrial cancer of prognostic significance?	Prognosis	no	
148	Is neuroendocrine differentiation in endometrial cancer of prognostic significance?	Prognosis	no	3
149	Is transvaginal ultrasound useful in determining if there is cervical extension, parametrial extension or lymphadenopathy?	Brognosis	no	
150	Is contrast enhanced ultrasound useful to diagnose myometrial invasion?	Prognosis Prognosis	no no	2
151	Is multidetector CT useful for staging EC?	Prognosis	no	2
152	Are any serum markers effective for informing prognosis in endometrial cancer? What molecular or other markers are available/under evaluation to predict adverse outcome in women with low	Prognosis	no	
153	stage low grade endometrial carcinoma?	Prognosis	no	3
154	What predictive biomarkers can be used to assess risk of relapse? What are the support and information needs of patients when endometrial cancer is suspected and referral	Prognosis	no	3
155	instigated?	Psychological aspects	no	4
150	What measures can reduce the psychological distress of patients faced with losing their fertility as a result of treatment for endometrial cancer?	Psychological aspects
